

The Dentistry & Oral Health Innovation Awards and The i2 Event

We are delighted to announce that the inaugural Dentistry & Oral Health Innovation Awards are now accepting entries.

All those who have novel ideas for new technologies, services or processes related to dentistry and oral health are encouraged to submit via the web – see www.medicalfutures.co.uk for further information.

Short listed entrants will be invited to pitch their ideas to an expert panel at the BDA in October and winners will be considered for an R&D award of up to £500,000.

For those who need practical help to develop their ideas, there is a bespoke conference taking place at the Royal Society of Medicine on the 7th of July with a group of expert speakers to advise on all aspects from Intellectual Property to Business Planning and Prototype & Design. The keynote speaker is Professor Mel Rosenberg, innovator behind the phenomenally successful Dentyl pH.

For further information please see http://medicalfutures.co.uk/programme_new.php?category=programme&mn=1

To book, please call Martine Morris on 07939 801100, quoting TIW for a special rate.
